Krpano, A-Frame, Three.js

Server

NodeJS, Apache, Nginx,
Linux, AWS, GCP, Firebase,
3rd Party API, Restful API

Others

Git, Sketch, Emmet

Hi, I'm Jason Tseng and I have 4 years of experience in product developing. I mainly use HTML5, CSS3 and JavaScript, strong in developing, project structure developing, refactor.

Experience

2017/02 -
present

iStaging - VR/AR for business solution

- Handle a product TourRing with 90% code, based on AFrame, Vue2, Three.js, Stylus, Firebase, Agora(WebRTC SDK)

This is iStaging's latest product. I mainly develop structure of frontend, do my best for RWD in UI and some UX that designer didn't consider. In the product, I have to control 2 versions: overseas and Taiwan. They got different UI and I let both of them worked.

- Handle a product LiveTour with 85% code, based on Krpano, Vue2, Three.js, Stylus, Firebase, NodeJS. I survey new technology for webVR framework - krpano. I made JSON data and parsed to XML which is krpano's format.

- Handle a product VREditor with 50% code, based on Vue2, Three.js, Stylus, Firebase. This is my teamwork product. The challenge of the product is listening Firebase serverless data, it needs to handle new data listened but unsaved state should in control.

2016/04 -
2017/01

Nong Design - Case jobs for Wordpress website

- Developed projects based on WordPress, PHP.
- Developed static RWD website based on JavaScript, jQuery, Gulp and SCSS.
